

Magnetic Holding HEV-K Magnetic Holding DC Contactor

USES

This product realizes zero power connection when working. It is suitable for 5G、charging pile, telecommunication communication equipment, automation equipment, electric vehicle, energy-saving and environmental protection system, road traffic lighting system, programmable power supply and uninterrupted power supply equipment.

HEV	□	-7	A	K	X	L	-□	※	/12V
1	2	3	4	5	6	7	8	9	10
1	Product type: HEV one group circuits; HEVJ two group circuit								
2	Rated current								
3	Contact Rated Voltage: 1:200V; 7:1000V								
4	Circuit structure: A - one normally open; B - one normally closed; C - 1NO 1NC; J - 2NO ;F - one normally open with one auxiliary switch (the auxiliary switch and main contact have the same structure); G - one normally closed with one auxiliary (auxiliary switch and main contact have the same structure). (For other auxiliary switch structures, add 2 or 3 numbers after the model to describe the auxiliary switch structure)								
5	Coil type: H with coil economizer; K dual wire magnetic holding (single coil, dual wire self-locking); 2K three wire magnetic holding (double coil, three wire self-locking); P signal control; R built-in pre charging type [relay drive] (the left digit of the pre charging function is the pre charging delay time, used to control the coil; the right digit is the resistance value with resistance); Y: External pre charging [MOS driver] (the left digit of the pre charging function is the pre charging delay time, and the right digit is used as a lead for controlling the coil. If it is greater than 1, it is the resistance value of the live resistance)								
6	Coil outgoing mode: X Wire (390mm); O Other								
7	Mounting bracket type								
8	None: auxiliary switch and main contact have the same structure (default); 2: The structure of auxiliary switch and main contact is opposite; 3: Special auxiliary switch structure								
9	Other special functions: V with capacitive type load; N no polarity								
10	Coil rated voltage: 6V,12V,24V,36V,48V,60V,72V,84V,120V,150V,220V etc.								

ORDER FORM DESCRIPTION

When ordering, please state the following: name, full model, control coil voltage specification, installation frame type, whether with auxiliary contact, order quantity. For example: Magnetic Holding DC Contactor HEV-K-□-□/24V 100pcs, indicating the load rated current 30A,50A,100A,150A,200A,250A,300A,400A,600A,800A, without auxiliary contact, default mounting bracket, coil control voltage 24V purchase 100pcs. Special voltage specification products, such as user needs can be special order.

TECHNICAL PARAMETERS

(Version 2.64)

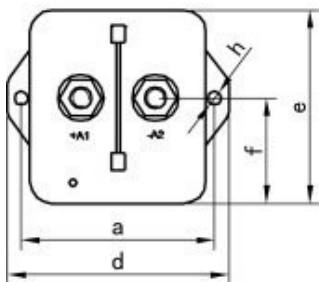

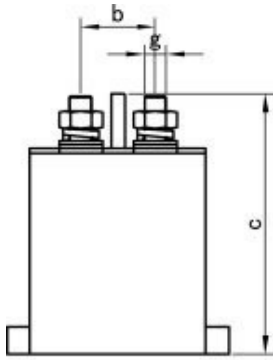

SAYOON Product Type	HEV-K
Contact form	1 Circuit
Coil Rated voltage (DC V)	6V,12V,24V,36V,48V,60V,72V,84V,120V,150V,220V etc.
Contact voltage (DC V)	150V,450V,750V
Contact circuit rated load current (DC-1)	30A,50A,100A,150A,200A,250A,300A,400A,600A,800A
Typical voltage drop across contacts per 100A	≤80mV
The cooling pull-in voltage at (20±5)°C (V)	≤80%
The cooling drop-out voltage at (20±5)°C (V)	≤80%
Working voltage range of 40°C coil	0.8-1.2Us
Pulse dration	200ms≤t≤1s
Operating frequency(square wave)	1 minute≤6 times
Insulation Resistance	100MΩ
Electric strength to resist	50Hz/60Hz 1800-2200VAC 1minute
Typical fault currents which can be ruptured	1500A/5ms at 48V DC
Coil power (W)	K Start: 5-60, Keep: 0
Temperature rise of coil (K)	Normal temperature
Temperature rise on outgoing terminal (K)	≤65
Electrical life	10,000 times
Mechanical life	300,000 times
Work specification	Continuous
Contact material	Alloy
Inrush time (max)	130ms
Maximum switching current	2500A 320VDC (more than once)
Maximum switching power	800kW
Load terminal type	M5,M8,M10 Screw
Coil terminal type	0.3 square silicone wire, 390mm long
Auxiliary contact rated load (optional)	3A/30VDC

OTHER TECHNICAL PARAMETERS

Testing organization certification	CE,FCC,RoHS
------------------------------------	-------------

Note:As regarding to the different using environments of customers which requires different focus of the functions,and in order to improve the comprehensive properties of our products,sayoon may adjust the coil parameters,temperature rise and so on. The above parameters are for reference only, For details, please refer to the guidelines for selection and use of the SAYOON DC contactor.

 Public negative electrode:COM(Yellow)Connect the negative pole of the power supply ,
 -X1(Black)Connect the positive pole of the power supply ,
 +A1.-A2 Main contact disconnection.
 COM(Yellow)Connect the negative pole of the power supply ,
 +X2(Red)Connect the positive pole of the power supply ,
 +A1.-A2 Main contact on.

FEATURES

Suitable for new energy electric vehicles, charging facilities, photovoltaic, wind power generation systems, automotive air conditioning, communication power, UPS, power and other electrical control circuit of the switch control, with small size, large load capacity, no spark, long service life, maintenance simple and other characteristics, by users. 1 DC high voltage power: the product cavity filled with rare mixed gas, arc cooling capacity, 2 control load capacity: with 30A-600A, working voltage range of 5-1000VDC load capacity; 3 safety: insulation structure, can be in flammable or hazardous environment work, coil and contacts will not oxidation and pollution; 4, compared with similar products small size, light weight, power consumption. The product in accordance with the standard JB2286-78, JB3974-85, YD / 585-92, YD / T512-92 requirements; after the factory and relevant test unit test, meet the requirements of the standard specification, users use for many years, maximum to meet user needs, quality and reliable.
